

How to compress videos using Windows Movie Maker

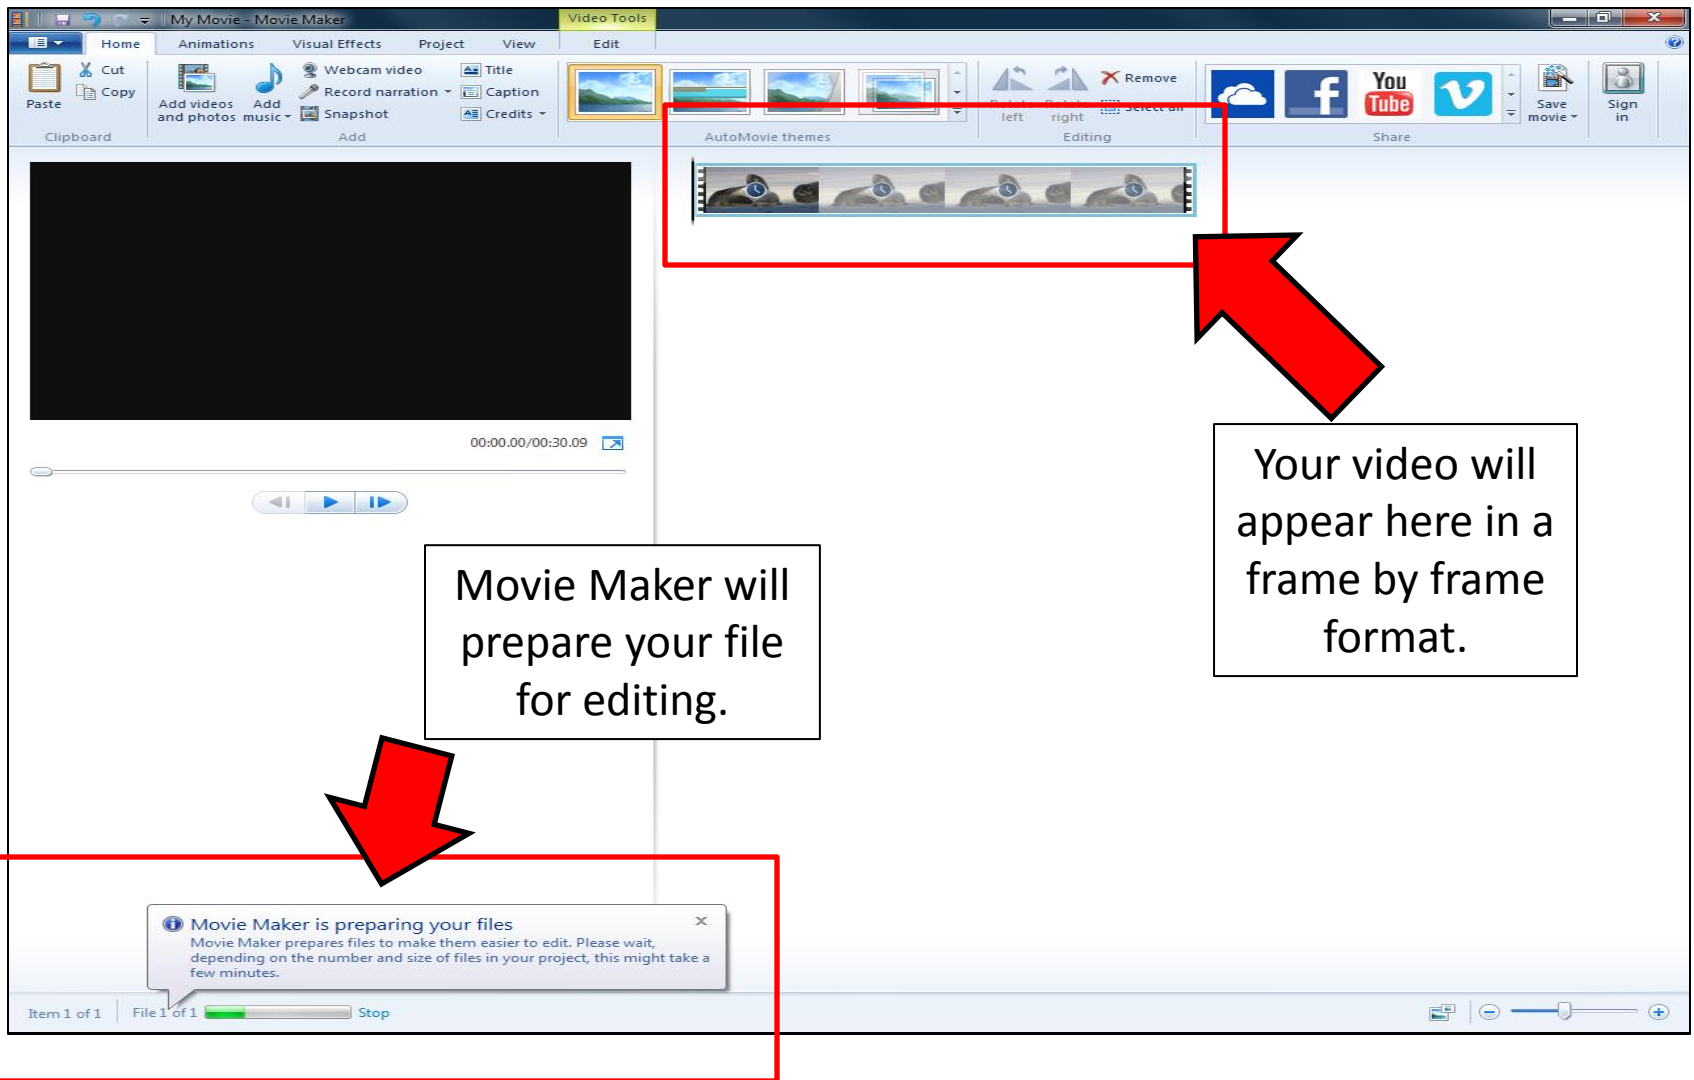

Windows Movie Maker

- If you don't have Windows Movie Maker on your computer, you can download it for free here: <http://windows.microsoft.com/en-us/windows-live/movie-maker#t1=overview>

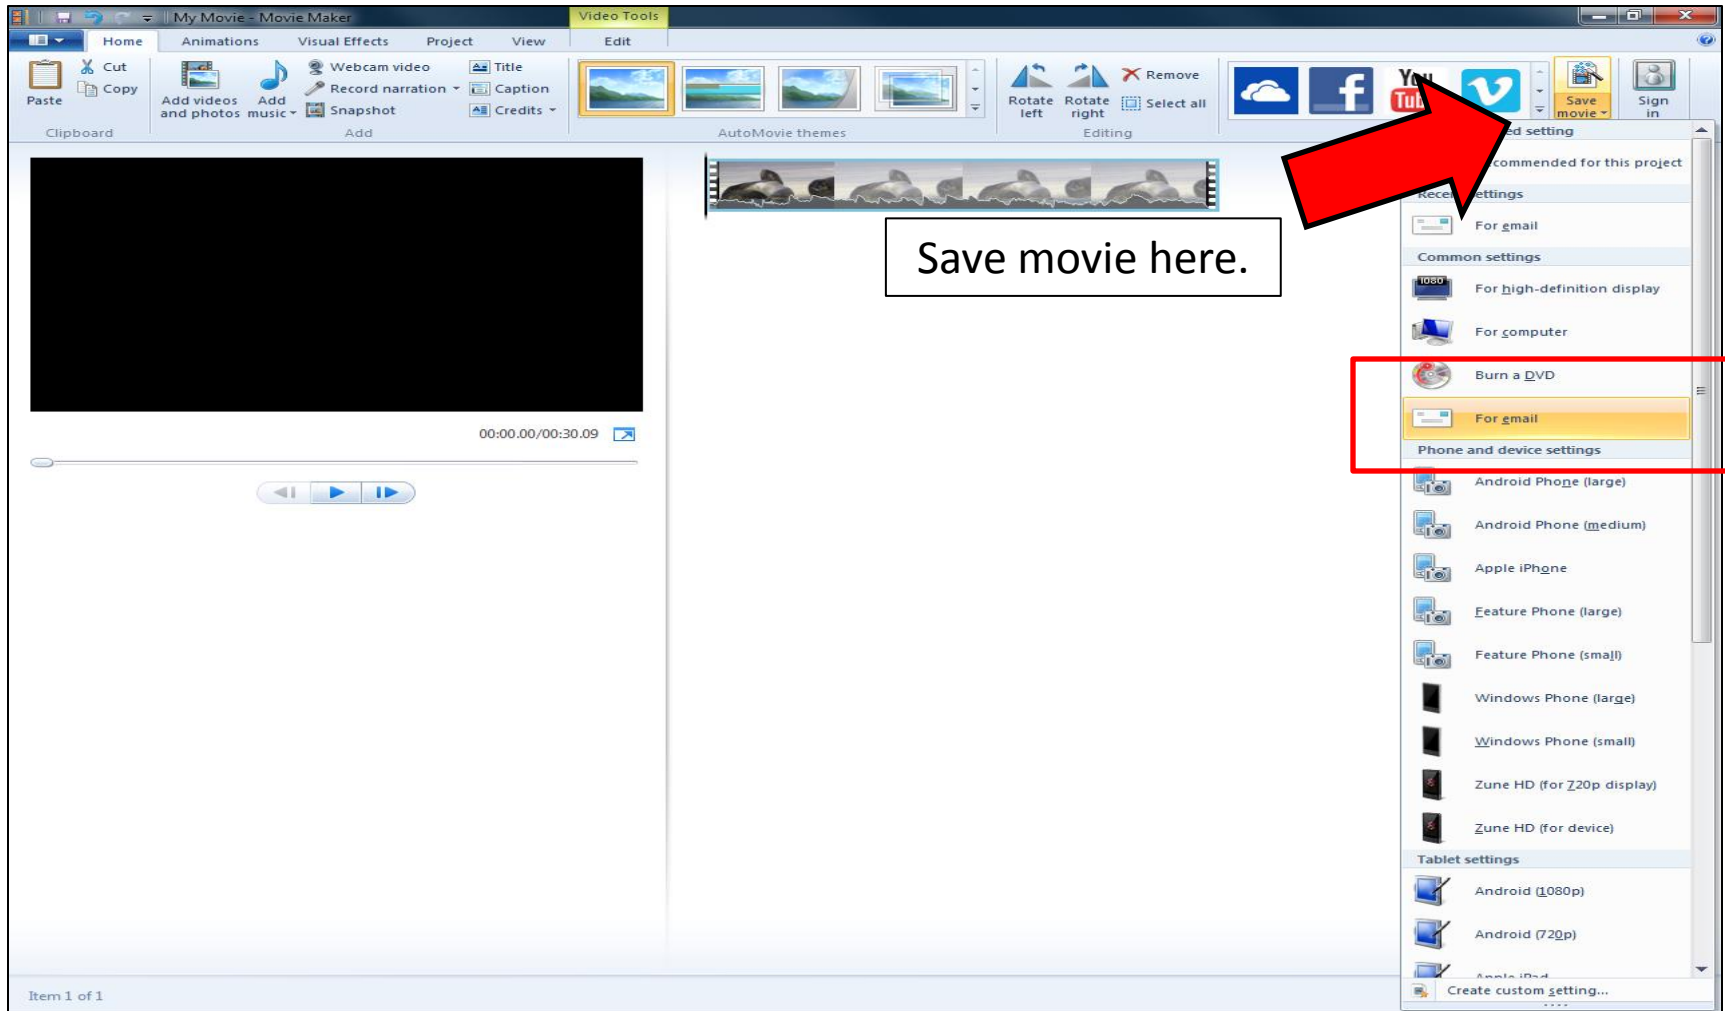

Open Windows Movie Maker

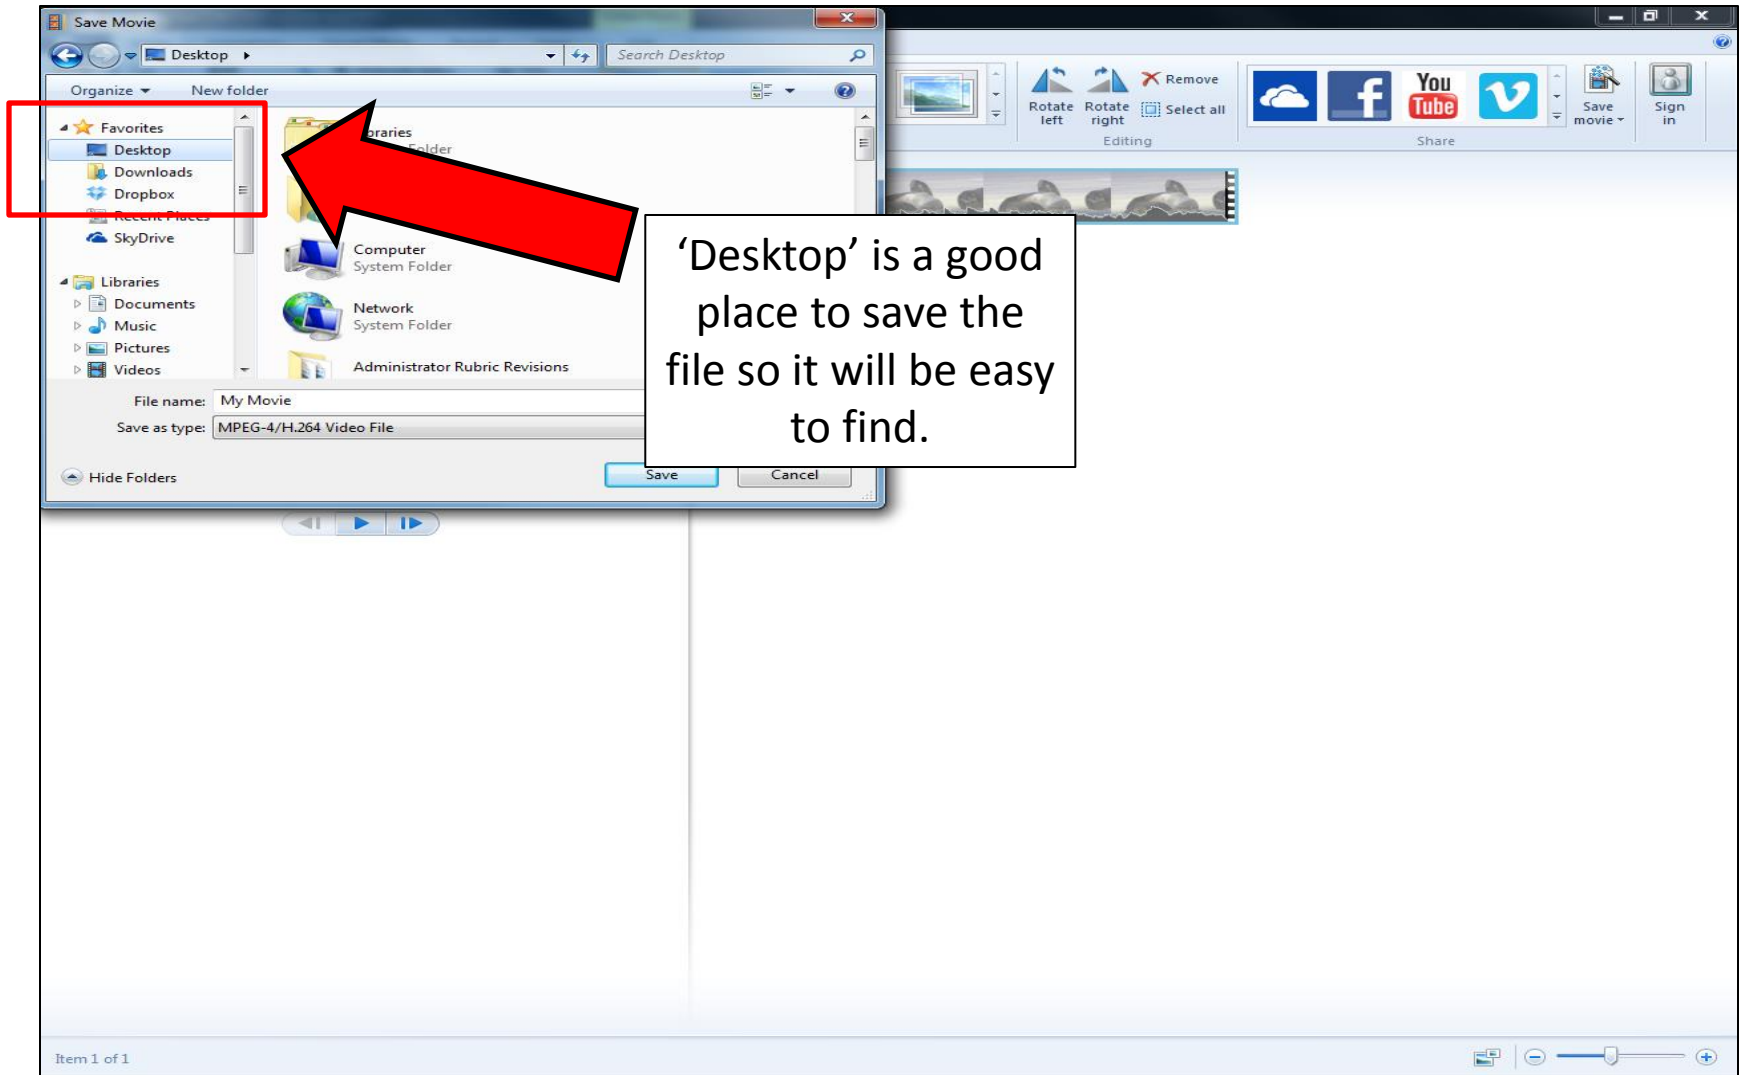

Once you have found the file, you will see the following screen.

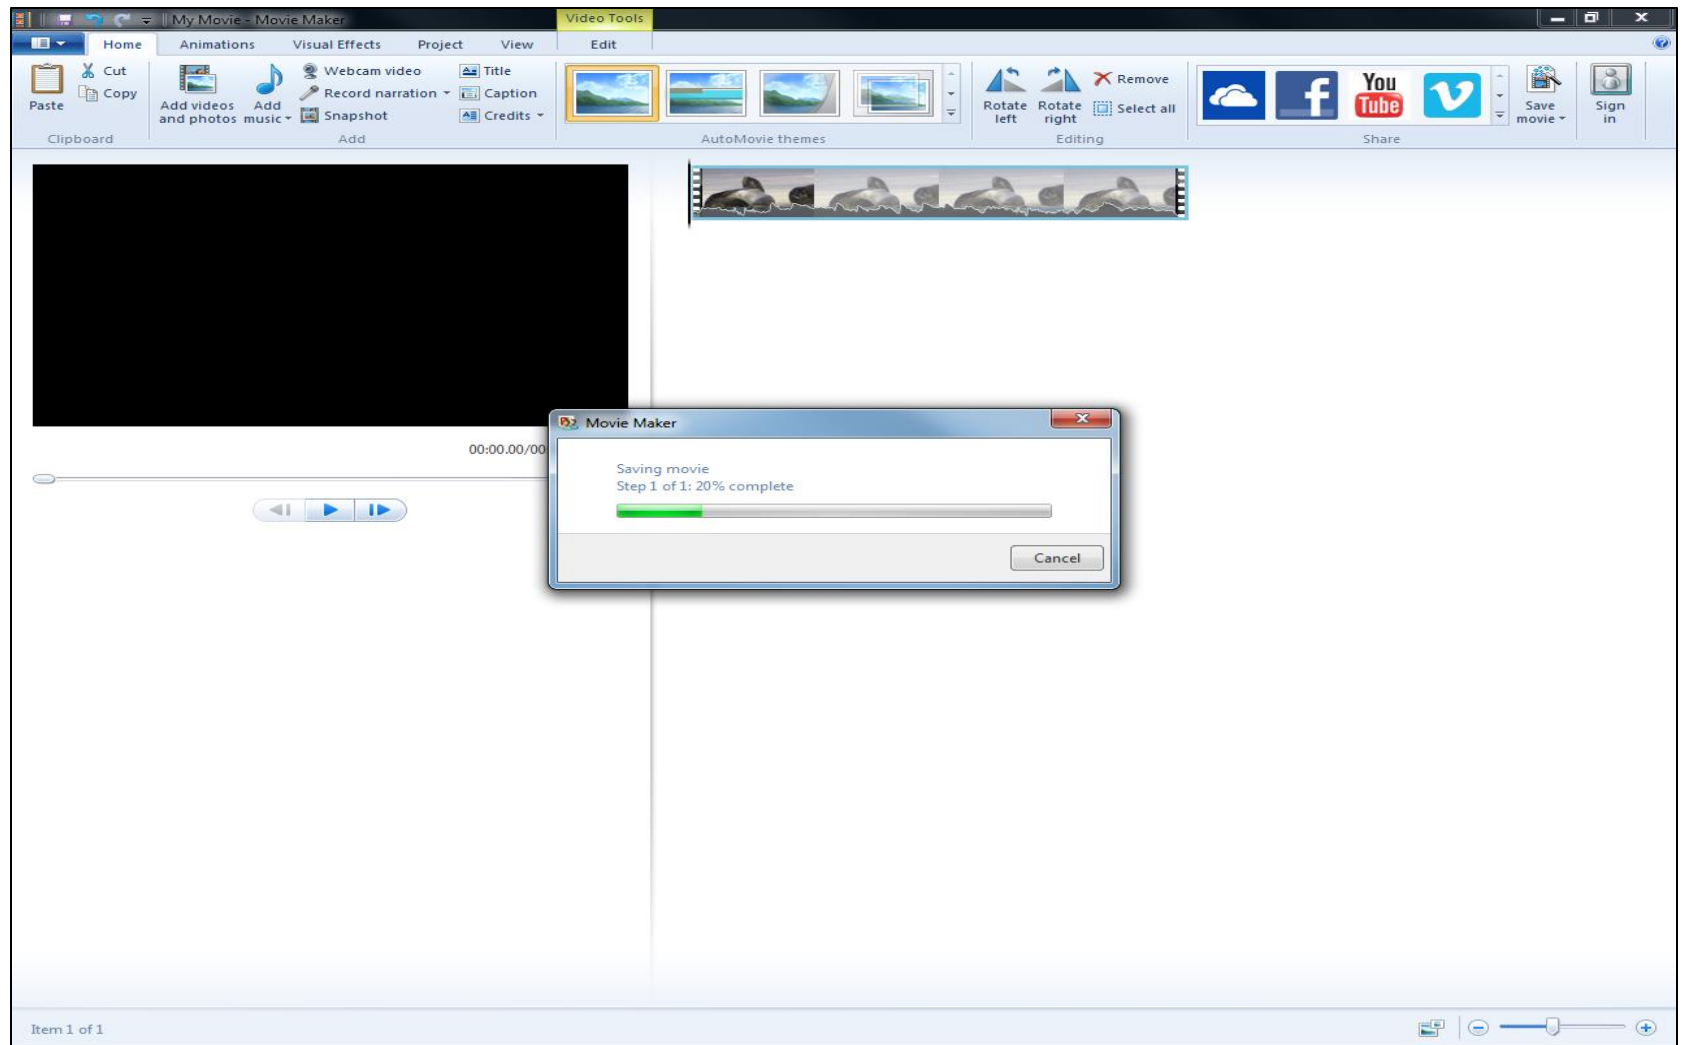

Once you have done any needed editing, save your movie for email.

Title your movie and save it somewhere easy to find.

Movie Maker will save your file in the appropriate format.

Movie Maker will alert you when the conversion is complete.
